Making the Forest Sector Transparent

Making the Forest Sector Transparent is a four-year programme supporting civil society groups in forest-rich countries to advocate for greater transparency and good governance. An important part of the programme is the production of annual report cards by independent NGO partners to monitor the forest sector in their countries. The number of NGO partners has increased year-on-year, starting in Cameroon, Ghana, Liberia and Peru in 2009, to including Ecuador in 2010 and Guatemala and the Democratic Republic of Congo (DRC) in 2011.

The 2011 Report Card consists of 20 key indicators on important provisions of the legal and regulatory framework that applies to the forest sector governance. The partners collected data between July 2011 and August 2011. Each indicator includes an 'objective' assessment of whether clear provisions exist and information on them is publicly available, resulting in a 'yes', 'partial', or 'no' overall. This is combined with a more 'subjective' assessment of whether there is evidence of change in the last year (where a report card was produced in 2010) and analysis of whether the provision enables transparent access to information and/or decision-making. Data collection was largely carried out through office-based research, for example by searching the websites of government institutions and other official sources of information, supplemented where appropriate by contacting key informants and requesting specific information. The data presented on each indicator is organised as shown in the Table below.

Indicator assessment

Does it exist?	Is it available?	Indicator	
Yes – specific provision in current laws and norms that have been passed by state and applies to the forest sector	Yes – available to public from official sources (websites, publications, media)	Yes	
	Partial – some information provided but not complete (e.g. only parts of manuals)	Partial	
	No – although evidence that exists, it is not available (includes when only unofficial sources)	No	
Partial – process underway to develop it, but not yet established in law; or limited provision or relevance to forest sector	Partial – some information provided but not complete (e.g. only parts of manuals)	Yes	
	Partial – some information provided but not complete (e.g. only parts of manuals)	Partial	
	No – although evidence that exists, it is not available (includes when only unofficial sources)	No	
No – no current provision or plans to establish (even though needed)		No	
Not applicable - not relevant to the country-specific context		N/A	

Specific questions guided the determination of the existence and availability of the provisions for each indicator. In order to receive a 'yes', the provision needed to both exist in the legal and regulatory framework and information needs to be publicly available on it, whereas a 'partial' or 'no' indicator reflected that either one or the other criteria (or both) was partially or not met.

The change in the last year was assessed against the following scale:

-  Significantly Improved - major development such as new law or information system
-  Improved - steps forward such as initiatives with potential to improve transparency
-  No Change - no evidence of major change in the conditions for transparency
-  Worsened - steps backward such as activities taking place without transparent processes
-  Significantly Worsened - major deterioration such as termination of laws or systems

Specific information was provided on the full titles of the applicable laws or other norms, the names of the authorities or institutions responsible for them, the dates when they were passed, and the website or other official sources where they can be accessed.
